**67%** FULL-TIME BEEF PRODUCERS **70%** PREFER PRINT **84%** CATTLEMEN'S NEWS IS HELPFUL

**BLEEDS & LIVE AREA**

Create at least a 1/4" (0.25") bleed beyond trim on all sides. All critical graphics and content must be kept within the Live Area dimensions, preferably .75" for 2-page spreads and 1" for full page spreads.

**COLOR FORMAT**

CMYK color is required (not RGB). **Black type MUST be 100% black (C=0, M=0, Y=0, K=100).**

Cattlemen's News is printed in a high-speed web printing environment. To help keep costs down, this environment has expected variances to plan for.

Black and white ads and grayscale images should be converted to grayscale using only black and **never** submitted using all four CMYK colors as a build. This can lead to unbalanced color and undesirable reproduction. Rich black or 4-color black is **NEVER** recommended and could also lead to registration issues and undesirable output, especially if applied to black text or when white text is reversed out in rich black boxes. (This is especially true of small and thin-faced fine print in both cases.) 4-color solids should not exceed a maximum density of 220% total ink coverage. This can lead to muddy and flat reproduction, dirty margins and create off-setting ghost images on other pages.

**FILE FORMATS**

PDF files preferred – Version 3.0 or newer exported as PDF/X/1-A file with press/print-optimized settings. Fonts must be imbedded and **NOT** subsets. Images must be imbedded as well and be at least 300 dpi at actual size (no stretching).
